Dear Mr. Adiutori,

According to my recollection, a reply was already sent to you in mid-March. With regret, we feel that Chemical Engineering is not the right magazine for this manuscript, because software for fluid flow calculations has become so widely available and widely used.

If that message did not reach you, kindly accept my apologies.

Sincerely,

Nicholas P. Chopey
Editor-in-Chief

Dear Editor Chopey,

Please let me know whether you are going to publish "A Transformed Moody Chart that Is Read without Iterating".

Thanks!

Eugene F. Adiutori
