Re: "A New Look at the Relationship Between Heat Flux and Temperature Difference
During Nucleate Boiling"

Dear Dr. Adiutori:

The reviews of your manuscript which is referenced above have been received and are enclosed. Professor Hensel and I have conferred and reviewed the material and we are sorry to inform you that your manuscript will not be accepted for the 1991 National Heat Transfer Conference. The statements and appraisals of the reviewers do refer specifically to concerns with respect to the utilization of the relationship for the heat flux as a function of temperature difference that is proposed in the manuscript. We do wish to thank you very much for submitting your paper.

Sincerely yours,

A handwritten signature in cursive script that reads "Ralph Greif".

Ralph Greif
Professor
