Gentlemen:

I am herewith returning the book, The New Heat Transfer, which was sent on approval. I would comment that the author has taken a great deal of space to expound on something that is basically quite simple. While I agree with the basic premise, I found myself offended by the continual polemics. The style is more reminiscent of Senator McCarthy chasing Communists than an engineering text.

Very truly yours,

J.A. Royer,  
Chief Project Engineer
